

- Source Code:

```
class control {  
    public static void main(String[] args)  
    {  
        //Prints hello world  
        System.out.println("Hello World");  
  
        //Displays the sum of two numbers  
        System.out.println("5 + 5 is " + (5+5));  
  
        //If statement and conditional operators  
        if (5 < 10) {  
            System.out.println("5 is less 10");  
        }  
  
        //Show the use of an if/else statement  
        if (10 > 15) {  
            System.out.println("10 is greater then 15");  
        } else {  
            System.out.println(("10 is not greater then 15"));  
        }  
    }  
}
```

- Output:

```
Hello World  
5 + 5 is 10  
5 is less 10  
10 is not greater then 15
```
